\* not pictured

The mounting base is indexed for the ATV and UTV sized wedges

Place desired indexed wedge into mounting base

Place handlebolt through indexed mounting block and wedge.

Place matching wedge as shown above and tighten a few turns.

Place in desired Lock And Ride® ATV or UTV hole.

Tighten wedgebolt.

Place FlexGrip through T-bar to desired orientation and tighten down handle nut.

Place t-bar on mounting block in desired orientation.

Tighten with provided handlebolt.
